Xiangning Liang

has successfully completed the online, non-credit Specialization

Psychological Research

In this specialization, learners developed knowledge about the fundamentals of research design for quantitative studies in psychology, analysis of data from quantitative studies in psychology, and ethical standards for conducting psychological research. Learning activities focused on applications of this knowledge to real-world scenarios and on critical thinking about problems faced by researchers in the past.

Mike Stadler, PhD,
Senior Content
Manager

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
